

**UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF RHODE ISLAND**

STATE OF COLORADO, et al.,

Plaintiffs,

v.

U.S. DEPARTMENT OF HEALTH AND
HUMAN SERVICES, et al.,

Defendants.

C.A. No.

Declaration of Lacy Fehrenbach-Marosfalvy

I, Lacy Fehrenbach-Marosfalvy, hereby declare:

1. I am over the age of 18, competent to testify as to the matters herein, and make this declaration based on my personal knowledge and the records of the Washington Department of Health (DOH) to which I have access.

2. I am the Chief of Prevention, Safety, and Health with DOH. In this role, I serve as a member of DOH's exec leadership team, oversee the work Executive Office of Prevention, Safety and Health set the strategic direction of the agency, ensure that we comply with all applicable federal and state laws and regulations, and, at the most basic level, work to protect and improve the health and well-being of all people in Washington state.

3. I have focused my career on shaping policies and implementing programs that address social and environmental factors that impact health outcomes and inequities so that all people, families, and communities can thrive. Before I began my current role, I served as Deputy Secretary of Health for COVID-19 response from June 2020 through January 2022. Prior to the pandemic, I served as Assistant Secretary of the Prevention and Community Health division. Before coming to Washington state, I worked on national public health policy in Washington, DC. I have more than 15 years of public health management and leadership experience, working on an array of issues including health system reform, access to healthcare, child and family health, infectious disease, and chronic disease, injury and violence prevention, and environmental health. I have managed various grants and cooperative agreements issued by the federal government during my career, and over the past nine years, I provided oversight and strategic direction to several major sources of federal funding related to environmental health and safety, infectious disease, chronic disease prevention, injury and violence prevention, child and family health, and

access to healthcare and social services received by the state of Washington. I holds a BS in Molecular and Cell Biology from Texas A&M University, an MPH from the George Washington University and I am certified in public health.

4. On March 24, 2025, the Centers for Disease Control and Prevention (CDC) issued five Notice of Awards which immediately terminated multiple pandemic-related grants, including those funded under the Coronavirus Preparedness and Response Supplemental Appropriations Act, 2020 (CRRSA) and the American Rescue Plan Act (ARPA) Act. These notices purported to cut off funding immediately, effective March 24, 2025. Those notices are attached hereto as

Exhibits A–E

5. The grants being terminated support more than 200 positions and contracts with local health jurisdictions, tribes, and community partners.

6. If these terminations are not enjoined, it would have a devastating effect on DOH, its operations, and the health and well-being of Washington residents.

7. In total, these terminations purport to rescind approximately \$129 million in funding awarded to the Department of Health but not yet spent. This federal funding is essential to the operation of numerous critical programs on which DOH and Washingtonians rely.

Epidemiology and Laboratory Capacity

8. The terminations rescind approximately \$118 million for epidemiology and laboratory capacity. This funding currently supports approximately 150 full-time employees, who will need to be let go. if their funding is cut.

9. These grants fund planning and response to communicable disease cases and outbreaks in Washington State, both existing and emerging. This includes the foundational work of laboratory testing, disease surveillance, disease control guidance, and case and outbreak

response.

10. This funding is used for laboratorians who perform critical disease testing at the state lab, epidemiologists who provide subject matter expertise guidance, communication and response, and informaticians and epidemiologists and necessary data systems upgrades that support reporting and surveillance of existing and emerging diseases.

11. All of this work is focused on preventing and reducing the impact of COVID-19, respiratory illness, and other emerging infectious disease among the people of Washington.

12. Terminating this funding immediately reduces the DOH's ability to respond to surges in COVID-19 and other respiratory viruses as well as emerging outbreaks for mpox, measles, and H5N1 avian flu. This funding also supports analytics work related to surveillance for post-COVID conditions, COVID risk factors, and health care access and health workforce challenges across the state of Washington.

13. The funding also supports necessary data systems upgrades that facilitate better disease reporting and surveillance. For example, the sudden termination of this funding forced the state to stop work on upgrading its laboratory information management system, leaving DOH without a way to modernize its out-of-date computer systems. DOH had planned to use the funding to bring a new system online over the next 14 months after investing more than \$12 million of CDC funding in its development. Stopping the project now means that Washington will not realize the benefits of that investment, and will likely not get anytime soon the modern laboratory information system that would have helped the state more effectively respond to future pandemics, and more quickly and efficiently get the lab results needed to control infectious disease threats such as measles, avian influenza, foodborne illness, shellfish toxins, and bioterrorism.

14. Terminating this funding also impacts the Care Connect Washington program

which is funded by two of these fund sources and described below under “Care Connect.”

15. DOH passes approximately 50% of the ARPA Epidemiology and Laboratory Capacity funding through to tribes and local health jurisdictions, meaning these terminations will have significant negative consequences on their missions as well. DOH had to immediately suspend these contracts and all work that they fund.

16. If this funding is not restored, DOH will soon have to furlough employees and/or lay people off, reduce capacity for testing, and scale back its work significantly. If layoffs occurred, even if funding were to be restored later, it would be very challenging to recruit highly trained technical staff back into DOH; regaining lost capabilities would take years if it were possible at all.

17. Without this funding, Washington and other states must stop this work, the people in our state and other states would be at greater risk for illness from a variety of infectious diseases, some of which cause severe illness, disability or death. In addition, communities across our state and beyond could see more and larger outbreaks of COVID-19, respiratory illnesses, and other emerging infectious diseases. Beyond individual health impacts, more and larger school or workplace outbreaks of some infectious diseases could disrupt learning, productivity, and societal functioning. In short, people, communities, our state, and the nation would be more vulnerable to infectious diseases and outbreaks, and we’d all be less safe.

Supplemental Immunization Funding

18. The terminations rescind approximately \$20 million in supplemental immunization funding. This supplement supports individual and community protection from COVID-19 and other vaccine preventable illnesses, including for diseases like measles, MPOX and H5N1, by supporting the infrastructure, communications support, and provider engagement to increase

vaccination rates.

19. The supplemental funding now subject to termination supports approximately 46 full-time employees. Approximately 75% of this funding is passed through to local health jurisdictions, tribes, community partners, contractors, and association partners who support vaccination efforts in the state.

20. The termination of this funding will lead to an immediate reduction in DOH and its partners' ability to vaccinate those at-risk for COVID and other vaccine-preventable diseases, especially those in communities who face significant barriers in access to care, such as rural areas and those with high social vulnerability index.

21. Termination has already required DOH to cancel its Care-A-Van (CAV) mobile health clinics that serve people across Washington state. Care-a-Van provides mobile health services including vaccinations and health education to those who are disproportionately impacted and communities that are underserved. CAV reaches all areas of Washington and provides needed services in areas where access to care is limited. The program prioritizes serving rural areas, BIPOC communities, immigrants and refugees, unhoused populations, children and schools, and areas with a high Social Vulnerability Index (SVI).

22. In a public health emergency, such as Measles or Highly Pathogenic Avian Influenza, CAV has the capability to rapidly stand up a vaccination or mass dispensing clinic to support medical countermeasures across all of Washington.

23. Since July 2024, CAV has administered over 6,800 COVID, 3,900 Flu, and 5,700 childhood vaccines. We anticipate providing approximately 2,000 childhood vaccines, 900 COVID vaccines, and 500 flu vaccines through the remainder of 2025.

24. DOH had to cancel a total of 93 clinics in communities across the state that were

scheduled between March 25 and June 30, 2025 due to the termination of funding. This included 39 school-based clinics anticipated to serve 800 children. There is a need to increase vaccinations for school aged children.

25. Termination of this funding will likewise force DOH to scale back its respiratory virus campaign, an educational campaign to support and encourage flu, COVID-19, and RSV vaccination, including co-administration of all eligible respiratory prevention vaccines, especially among populations with declining vaccination rates. It will also lead to decreased capacity for data requests and assessment of immunization data.

26. Termination of funding ends the Power of Providers (POP) initiative. POP is an established brand serving and mobilizing over 5,300 individual providers covering every county in Washington state. Power of Providers generates and amplifies immunization messaging, to equip providers in serving as trusted messengers to increase uptake of vaccines. POP also addresses healthcare provider burnout, long COVID diagnosis and treatment, and digital health innovations to expand access to health and social care.

27. Because this funding supports messaging and infrastructure to increase vaccination rates broadly and among the most vulnerable, loss of this funding increases risks for vaccine-preventable illness and possible negative health outcomes from these, including severe illness requiring hospitalization, disability, or even death associated with some of these diseases. These impacts will likely be felt primarily among people and families with low incomes, who lack insurance, or who face other barriers in access to care.

28. In addition, schools and communities in Washington state may face increased risk for outbreaks of vaccine preventable illness.

Care Connect

29. The terminations also rescind approximately \$1.5 million from Care Connect Washington. Care Connect Washington is funded through a combination of the Epidemiology and Laboratory Capacity grant (described above) and the Care Connect grant. Care Connect Washington is a partnership between DOH, eight regional hubs, and more than 100 local, care coordinators in communities across the state. Care Connect increases access to health and social care for individuals across the state via a trusted community-based workforce and increases support for the community-based organizations that employ this workforce

30. Care Connect Washington is a program developed early in the pandemic to provide food and other support to people with COVID-19 so they could isolate at home. Now the program is helping meet the longer-term needs of people who have been affected by COVID-19. For example, some people experience long-term side effects from COVID-19. Other people may have been sick and lost their job and need help getting back on their feet. Care Connect Washington helps these vulnerable individuals.

31. The Care Connect system strengthens communities by helping people achieve stability and better health. Local care coordinators work with people affected by COVID to help them apply for programs such as unemployment benefits, subsidized housing or childcare, food assistance programs such as SNAP or WIC, Apple Health, and more. Care Connect provides the information people need in their preferred language.

32. Termination of grant funding will require DOH to terminate two full-time employees, in addition to several of the FTE included above who are funded through the ELC funds, and reduce services to vulnerable populations.

33. Between loss of the ELC and Care Connect funds that were terminated on March 24, 2025, we must suspend funding to the regional Community Care Hubs across the state. The hubs will lose the last 4 months of support. This is a crucial time as it is when we planned to transition much of this work to Washington state's Accountable Communities of Health later in the year. The Community Care Hubs support more than 350 Community Health Workers. We estimate approximately 4,500 individuals across Washington would have been connected to resources and services in their communities between April-June.

Partnership Evaluation

34. Terminations included approximately \$1.5 million in funds that supported 0.5 FTE and a contractor who were carrying out evaluation of Care Connect related initiatives in. This jeopardizes the publication of the studies and broader dissemination of the findings and lessons learned from the work carried out.

Health Disparities

35. Lastly, the terminations rescind approximately \$3 million in funding that supported initiatives to address COVID health disparities among high-risk and underserved populations, including racial and ethnic minority populations.

36. In particular, this grant funded the Community Collaborative, a collective that centers the voice and perspective of community partners so that DOH practices, programs and policies reduce health inequities and improve health outcomes for Black, Indigenous, communities of color and all Washingtonians.

37. The goal of the Community Collaborative is to ensure DOH applies equity and social justice to public health emergency planning and decision-making. Through the Collaborative, DOH provided subawards to fourteen community-rooted, community-led entities

to mobilize partners and organizations to address COVID health disparities.

38. Terminating these funds jeopardizes all of these services and puts countless Washingtonians at risk of worse health outcomes including severe illness, disability, and death.

I declare under penalty of perjury under the laws of the State of Washington and the United States of America that the foregoing is true and correct.

Executed this 29th day of March 2025, in Olympia, Washington.

HEALTH, WASHINGTON STATE DEPARTMENT OF

6 NH23IP922619-05-08

1. term and condtions

TERMS AND CONDITIONS OF AWARD

Termination: The purpose of this amendment is to terminate the use of any remaining COVID-19 funding associated with this award. The termination of this funding is for cause. HHS regulations permit termination if “the non-Federal entity fails to comply with the terms and conditions of the award”, or separately, “for cause.” The end of the pandemic provides cause to terminate COVID-related grants and cooperative agreements. These grants and cooperative agreements were issued for a limited purpose: to ameliorate the effects of the pandemic. Now that the pandemic is over, the grants and cooperative agreements are no longer necessary as their limited purpose has run out. Termination of use of funding under the listed document number(s) is effective as of the date set out in your Notice of Award.

Impacted document numbers are included on page 2 of this Notice of Award (NoA).

No additional activities can be conducted, and no additional costs may be incurred, as it relates to these funds. Unobligated award balances of COVID-19 funding will be de-obligated by CDC. Award activities under other funding may continue consistent with the terms and conditions of the award.

Final Federal Financial Report (FFR, SF-425): Within 30 days please submit final FFR’s for impacted document numbers. The FFR should only include those funds authorized and expended during the timeframe covered by the report. The final report must indicate the exact balance of unobligated funds and may not reflect any unliquidated obligations. Should the amount not match with the final expenditures reported to the Payment Management System (PMS), you will be required to update your reports to PMS accordingly.

All other terms and conditions of this award remain in effect.

AWARD ATTACHMENTS

HEALTH, WASHINGTON STATE DEPARTMENT OF

6 NH75OT000042-01-09

1. terms and conditions

TERMS AND CONDITIONS OF AWARD

Termination: The purpose of this amendment is to terminate this award which is funded by COVID-19 supplemental appropriations. The termination of this award is for cause. HHS regulations permit termination if “the non-Federal entity fails to comply with the terms and conditions of the award”, or separately, “for cause.” The end of the pandemic provides cause to terminate COVID-related grants and cooperative agreements. These grants and cooperative agreements were issued for a limited purpose: to ameliorate the effects of the pandemic. Now that the pandemic is over, the grants and cooperative agreements are no longer necessary as their limited purpose has run out. Termination of this award is effective as of the date set out in your Notice of Award.

No additional activities can be conducted, and no additional costs may be incurred. Unobligated award balances will be de-obligated by CDC.

Closeout: In order to facilitate an orderly closeout, we are requesting that you submit all closeout reports identified below within thirty (30) days of the date of this NoA. Submit the documentation as a “Grant Closeout” amendment in GrantSolutions. The reporting timeframe is the full period of performance. Please note, if you fail to submit timely and accurate reports, CDC may also pursue other enforcement actions per 45 CFR Part 75.371.

Final Performance/Progress Report: This report should include the information specified in the Notice of Funding Opportunity (NOFO). At a minimum, the report will include the following:

- Statement of progress made toward the achievement of originally stated aims.
- Description of results (positive or negative) considered significant.
- List of publications resulting from the project, with plans, if any, for further publication.

Final Federal Financial Report (FFR, SF-425): The FFR should only include those funds authorized and expended during the timeframe covered by the report. The final report must indicate the exact balance of unobligated funds and may not reflect any unliquidated obligations. Should the amount not match with the final expenditures reported to the Payment Management System (PMS), you will be required to update your reports to PMS accordingly.

Equipment and Supplies - Tangible Personal Property Report (SF-428): A completed SF-428 detailing all major equipment acquired with a unit acquisition cost of \$10,000 or more. If no equipment was acquired under the award, a negative report is required

AWARD ATTACHMENTS

HEALTH, WASHINGTON STATE DEPARTMENT OF

6 NU50CK000515-05-15

1. Terms and Conditions

TERMS AND CONDITIONS OF AWARD

Termination: The purpose of this amendment is to terminate the use of any remaining COVID-19 funding associated with this award. The termination of this funding is for cause. HHS regulations permit termination if “the non-Federal entity fails to comply with the terms and conditions of the award”, or separately, “for cause.” The end of the pandemic provides cause to terminate COVID-related grants and cooperative agreements. These grants and cooperative agreements were issued for a limited purpose: to ameliorate the effects of the pandemic. Now that the pandemic is over, the grants and cooperative agreements are no longer necessary as their limited purpose has run out. Termination of use of funding under the listed document number(s) is effective as of the date set out in your Notice of Award.

Impacted document numbers are included on page 2 of this Notice of Award (NoA).

No additional activities can be conducted, and no additional costs may be incurred, as it relates to these funds. Unobligated award balances of COVID-19 funding will be de-obligated by CDC. Award activities under other funding may continue consistent with the terms and conditions of the award.

Final Federal Financial Report (FFR, SF-425): Within 30 days please submit final FFR’s for impacted document numbers. The FFR should only include those funds authorized and expended during the timeframe covered by the report. The final report must indicate the exact balance of unobligated funds and may not reflect any unliquidated obligations. Should the amount not match with the final expenditures reported to the Payment Management System (PMS), you will be required to update your reports to PMS accordingly.

All other terms and conditions of this award remain in effect.

TERMS AND CONDITIONS OF AWARD

Termination: The purpose of this amendment is to terminate this award which is funded by COVID-19 supplemental appropriations. The termination of this award is for cause. HHS regulations permit termination if “the non-Federal entity fails to comply with the terms and conditions of the award”, or separately, “for cause.” The end of the pandemic provides cause to terminate COVID-related grants and cooperative agreements. These grants and cooperative agreements were issued for a limited purpose: to ameliorate the effects of the pandemic. Now that the pandemic is over, the grants and cooperative agreements are no longer necessary as their limited purpose has run out. Termination of this award is effective as of the date set out in your Notice of Award.

No additional activities can be conducted, and no additional costs may be incurred. Unobligated award balances will be de-obligated by CDC.

Closeout: In order to facilitate an orderly closeout, we are requesting that you submit all closeout reports identified below within thirty (30) days of the date of this NoA. Submit the documentation as a “Grant Closeout” amendment in GrantSolutions. The reporting timeframe is the full period of performance. Please note, if you fail to submit timely and accurate reports, CDC may also pursue other enforcement actions per 45 CFR Part 75.371.

Final Performance/Progress Report: This report should include the information specified in the Notice of Funding Opportunity (NOFO). At a minimum, the report will include the following:

- Statement of progress made toward the achievement of originally stated aims.
- Description of results (positive or negative) considered significant.
- List of publications resulting from the project, with plans, if any, for further publication.

Final Federal Financial Report (FFR, SF-425): The FFR should only include those funds authorized and expended during the timeframe covered by the report. The final report must indicate the exact balance of unobligated funds and may not reflect any unliquidated obligations. Should the amount not match with the final expenditures reported to the Payment Management System (PMS), you will be required to update your reports to PMS accordingly.

Equipment and Supplies - Tangible Personal Property Report (SF-428): A completed SF-428 detailing all major equipment acquired with a unit acquisition cost of \$10,000 or more. If no equipment was acquired under the award, a negative report is required
